

EXHIBIT C

Dr. Mark Karolak, DO, FAOCC
Director of Facial Plastic Surgery

Dr. Mark Karolak is board certified in facial plastic surgery and otolaryngology. He is dedicated to providing the very best, natural-looking results through a personalized approach for each of his patients. By focusing his entire training and career exclusively on the face and neck, he has developed a unique, conservative technique under local anesthesia that "turns back the clock" without the telltale signs of having had "work done".

In addition to his many other accomplishments, Dr. Karolak has successfully performed over 3,000 face and neck lifts under local anesthesia, as well as thousands of other facial plastic procedures. His extensive experience and exceptional skill have made him one of the most experienced and sought after plastic surgeons in his field.

"From my heart to yours, I highly recommend Dr. Karolak. Do not have any fears or apprehension, you are in the hands of a gifted physician."
- Angel

YOU'RE IN GREAT HANDS at Reflections™

As we age, gravity, genetics and environmental factors like sunlight conspire to make us look older than we feel. While the telltale signs of aging can sometimes be addressed non-invasively, sometimes a surgical procedure is the best way to get natural, lasting results in a single treatment.

When surgery is the best option, our team of experienced professionals at Reflections will make the process of having a surgical procedure enjoyable and stress-free.

It would be our pleasure to discuss your cosmetic goals and walk you through our approach to achieving them.

Our single objective is to provide our patients with beautiful, natural looking results to help them look (and feel) wonderful.

We look forward to partnering in your care.
